<sup>1</sup> The methodology of calculating years to degree and credits to degree was originally adopted from the Colorado Department of Higher Education's (CDHE) ROI report and was modified in 2021. Median is used to better reflect time and credits to degree because this measure of central tendency is less influenced by skewness and outliers. Students who graduated with an associate degree in the most recent three academic years were used for both time to degree and credits to degree calculation.

<sup>2</sup> Excludes semesters when students were taking concurrent enrollment courses.

<sup>3</sup> Median credits reflect the median of *earned* credits at the respective institution. Transfer credits are excluded.

<sup>1</sup> The financial aid year consists of the fall of one calendar year, followed by spring and summer of the succeeding calendar year. For example, the 2017-18 aid year consists of fall 2017, spring 2018 and summer 2018. In contrast, the academic year is summer and fall of one calendar year and spring of the succeeding year. This difference is not considered when calculating of the proportion of students receiving financial aid; that is, proportions of financial aid recipients are divided by headcount totals for the similarly named academic year.
